EARLY YEARS EDUCATIONAL PSYCHOLOGY (0-5 YEARS)

Most children start school when they turn five, but there are early years support options for children from birth to 5 years of age. Our Early Years Educational Psychologists aim to work with the combined priorities of Manchester City Council, the children's family, the setting and the practitioners involved by using consultation approach.

This typically takes place in private and voluntary settings, in some school nurseries, and occasionally with children who are not yet in a setting. This process is helping our service reach the right children and families at the right time and forms part of the 'Assess, Plan, Do, Review' cycles for these children.

Feedback suggests that families and nursery's value the work we do around understanding their children's emerging needs, understanding the SEN/EHC Plan processes and supporting families to make informed decisions regarding pre-school provision and the transition beyond this.
